Shell Omala RL

Synthetic bearing and circulation oil

Shell Omala RL is a high performance synthetic bearing and circulation lubricant, based on synthesized hydrocarbon fluids. It offers outstanding lubrication performance under severe operating conditions, including improved energy efficiency and long service life.

Applications

- Moderately loaded enclosed industrial reduction gearboxes operating under arduous conditions, such as very low or elevated temperatures and wide temperature variations
- Particularly recommended for certain 'lubricated-for-life' systems
- Plain and rolling element bearings
- Oil circulation systems

Performance Features and Benefits

 Excellent anti-wear performance providing long component life

Provides high levels of wear protection for rolling element bearings and moderately loaded gearboxes, providing benefits over mineral oil-based products in terms of gear and bearing component life.

 Excellent oxidation and thermal stability extending lubricant life

Resists the formation of harmful products of oxidation at high operating temperatures, improving system cleanliness and therefore reliability of the equipment.

Longer service intervals

Extended component and lubricant life offers the opportunity to extend service intervals and to reduce maintenance and disposal costs.

 Superior lubricant performance improving gear efficiency

Offers improved low temperature performance and reduced change in viscosity with increase in temperature in comparison to mineral oil-based products. This provides better lubrication at low start-up temperatures and the opportunity for energy savings by optimising the viscosity for normal operating conditions.

- Outstanding rust and corrosion protection of all metal surfaces
- Rapid water shedding and air release performance

Specification and Approvals

Meets the ISO 12925-1 Type CKS specification.

Seal and paint compatibility

Omala RL is compatible with all seal materials and paints normally specified for use with mineral oils.

Change over procedure

Omala RL is compatible with petroleum mineral oils and no special change-over procedure is necessary. However, to realise the full benefits for Omala RL, it should not be mixed with other oils. It is also advisable to ensure that oil systems are clean and free from contamination to optimse potential service life.
